

## FLAT SALARY BASIS IS LIKELY

State Senator Favors Suggestion For Radical Change In County Offices

### JUDGESHIP BILLS ARE INTRODUCED

Anderson of Santa Ana Chairman of Important Civil Service Committee

A rather radical change in the system of compensation given county officers for their services has been proposed to State Senator J. N. Anderson, who was called home from Sacramento on business, and who leaves this afternoon to continue his work at the capitol.

In short, the proposal that has been suggested is that a definite salary be fixed for each county officer, which shall be all that he shall receive and none of which he shall be expected to expend in carrying out the work of the office. His office shall be provided with a sufficient number of deputies to do the work of the office. The Board of Supervisors may be given authority to increase the number of deputies employed should an unexpected increase of business produce a condition in which the deputies allowed could not do the work.

This proposal is looked upon with favor by Senator Anderson. He is of the opinion that the plan would be far better than the mixed system now in use. In some of the offices the principal is not expected to draw on his own salary provision to operate his office. In some offices, the sheriff's for instance, the salary of the principal is made with the expectation that he shall draw upon it to provide himself with whatever help he needs in his office. In the surveyor's office a per diem arrangement exists. In the recorder's office there is a combination of salary and fees. A like combination is supplied justices of the peace. In those offices the compensation fluctuates according to the amount of business.

"I have not yet introduced our amendment to the county government act," said Senator Anderson this morning. "Under the constitution the measure cannot go into effect until after ninety days from the close of the legislature. Under the plan of operations at the legislature, there will be one bill introduced for the proposed changes in all of the counties of the state. This bill will be introduced this month. It will come up for passage in the March session, and can be amended at that time. Therefore, the provisions that I and Assemblyman Weisel incorporate in this measure to be introduced this month does not necessarily mean that the bill will go through that way. I want the people to remember that they will have the opportunity to introduce evidence to show wherein any provision we may decide upon is unjust. I hope that some of the public bodies will undertake an investigation, such as was carried on by the grand jury, and make recommendations to us. My idea is to get as much information as possible upon the situation in the various county offices."

Yesterday there was introduced into both houses at the legislature a measure for creating a new judgeship in this county. In the absence of Senator Anderson, Senator Wright of San Diego introduced the bill in the senate, and Assemblyman Weisel introduced it in the assembly. This measure does not mention salary. The grand jury recommended that after January 1, 1915, the salary of the two judges be \$5,000 each instead of \$4,000 as now. The measure presented yesterday does not mention salary. That will be taken up in the county government act.

Senator Anderson says that he expects to introduce a measure along the line of compelling couples who expect to be married to give notice of that fact some days, probably two weeks, in advance.

"I believe it is well to give notice in advance of proposed marriages. I believe that such a system would work out to the betterment of marriage conditions, and would stop many hasty marriages. Another thing that I believe in is that of bettering marriage conditions by making it necessary that each party proposing to be married secure a medical certificate. I am not as radical upon this subject and do not deem it as advisable to go as far as some of those who have proposed the measure."

Senator Anderson is well pleased with the outlook at Sacramento. He says the legislature is composed of earnest, capable men, and that the indications are that a large amount of excellent work will be done, much of it as important to the good of the people as that done by the last legislature.

## Fought Burglar; Got Jewels and Cracked Skull

SOUTH PASADENA, Jan. 15.—Dr. John Paine fought a ten minute battle with a masked negro burglar who opened fire with two revolvers when discovered. After the burglar's ammunition was exhausted, Dr. Paine grappled with him and was beaten on the head with the revolver, fracturing his skull, but succeeded in wresting the weapon from the negro, also his wife's jewel case containing diamonds valued at \$5000. A posse is pursuing the burglar, who fled to the San Gabriel river.

### Bulletins of News

Hot from the wire up to 3:30 p. m.

#### THE WEATHER

Rain tonight and Thursday; light southeast winds.

**Sporting Editor Is Secretary of Nationals**  
NEW YORK, Jan. 15.—John B. Foster, sporting editor of a New York newspaper, has accepted the secretaryship of the New York Nationals.

**Woman Dropped Dead While Cooking Breakfast**  
REDLANDS, Jan. 15.—Mrs. Mary Damp, aged 67 years, a victim of apoplexy, fell dead yesterday while cooking breakfast at her home on Alvarado street.

Mrs. Damp was an aunt of Misses Harriet and Belle Northrup, nurses at the Redlands Hospital.

**Riverside Carries Municipal Ownership Water Bonds, 5 to 1**  
RIVERSIDE, Jan. 15.—The plan to bond the city of Riverside for \$1,600,000 in order to effect municipal ownership of the water system carried at yesterday's election by an overwhelming majority. The vote in favor of the bond issue was more than five to one.

**Capwell Resigns a Director of Home for Blind.**  
SAN FRANCISCO, Jan. 15.—H. C. Capwell, a director of the State Industrial Home for the Adult Blind, tendered his resignation to Governor Johnson yesterday. He said he expected to go abroad for a year.

**Czarina Expects Storm in the Spring**  
PARIS, Jan. 15.—The Temps correspondent at St. Petersburg says the czarina is expecting the visit of the storm in the spring. She is the mother of four girls and the czarvitch, who has been ill for some time.

## RAIN STORMS ARE GENERAL

Showers in Southern California—Moist Conditions Prevail Over World

LOS ANGELES, Jan. 15.—The showers which have been falling over Southern California today will be part of a storm which is encircling the entire world. Reports received yesterday afternoon by Ford A. Carpenter, local forecaster for the United States weather bureau, show that an extraordinary circle of storms is raging over Washington, the great lakes, Maine, the British Isles, Russia and northern China.

Storm signals to warn the ships on the California coast were hoisted at sunrise from stations at San Pedro, Redondo, Avalon and Venice. Wind accompanied the rains in this state and the snowstorms in the territory lying east of California. Moderate rains fell over northern and central California last night. Fresno received .14 of an inch. San Luis Obispo had .50, which pleased the San Joaquin valley farmers, and San Francisco was given .38 of an inch. Snow fell in eastern Washington and northern Idaho.

**Santa Barbara**  
SANTA BARBARA, Jan. 15.—Ninety-two hundredths of an inch of rain has fallen for the present storm with indications of more. One and ninety-nine one hundredths inches comprises the rainfall for the season.

**Redondo Beach**  
REDONDO BEACH, Jan. 15.—Eight hundredths of an inch of rain fell today with good indications for further fall.

**Oxnard Has Heavy Rains**  
OXNARD, Jan. 15.—An inch and a quarter of rain fell here up to noon. This afternoon the precipitation has been heavy and more is predicted for tonight and tomorrow. The rain is general throughout the beet and bean sections.

## U.S. WARSHIP FOR TAFT COMPLIES ACAPULCO IS ORDERED WITH BRITISH DEMAND

Cruiser "Denver" Will Clear From San Diego Tomorrow; To Protect Americans

### REBELS LOOTING COUNTRY IN ACAPULCO VICINITY

Control Casas Grandes; Americans to Be Taken Aboard Denver

WASHINGTON, Jan. 15.—The Navy department has ordered the cruiser Denver to proceed immediately to Acapulco to guard American residents and property in the event of attack. The Denver leaves San Diego tomorrow.

The determination to send a warship to Acapulco came when American Consul Edwards reported that the Mexican commander of the town admitted his inability to cope with the situation. The last reports said Radillo, commanding the rebels, was sweeping through the surrounding country looting and pillaging, and that refugees were flocking by the hundreds to Acapulco. The rebels also control Casas Grandes, where they forced the railroad to abandon operations.

Orders were sent that American refugees were to be taken aboard the Denver immediately upon its arrival.

#### DENVER LEAVES SAN DIEGO TOMORROW MORNING

SAN DIEGO, Jan. 15.—The commander of the cruiser Denver announced that it would clear for Acapulco early tomorrow and will make the run in four days. It carries two hundred and eighty jacksies and a company of marines.

#### AMERICAN MINISTER WIRES FOR SENDING OF CRUISER

MEXICO CITY, Jan. 15.—The American Ambassador last night wired Washington for an American gunboat to go to Acapulco to protect foreigners.

Two thousand rebels were last night reported in possession of the coast district.

Private advices from Vera Cruz say that an alleged anti-government plot has been discovered there to create excitement, break into jail and kill General Felix Diaz and the other political prisoners who have been locked up there for nearly two months.

### 5 LARGEST GATES WEST OF CHICAGO FOR FERNANDO LINE

LOS ANGELES, Jan. 15.—Five large gates—the largest west of Chicago—weighing a total of 130,350 pounds and costing a total of \$5,846.90, were bought yesterday by the Public Service Commission to be placed on the San Fernando pipe line leading from the aqueduct.

The gates range from fifty-four feet to thirty-six feet in circumference and are to be placed in the Franklin Canyon, where the San Fernando pipe line is located. The largest gate weighs 36,000 pounds and the smallest weighs 11,350.

## 20,000 GIRLS JOIN STRIKE

Join Garment Makers—Firm With 400 Employees Yields to Strikers' Demands

NEW YORK, Jan. 15.—Twenty thousand girls employed in the dress and waist industry struck this morning, bringing the total number of workers out in the great garment strike close to 60,000. The decision to send the dress and waist workers out was reached at a meeting of the International Ladies' Garment Workers' Union last night.

The first sign of capitulation on the part of the manufacturers' association was seen last night, when the firms of Isaac Cohen and Louis Schepster, underwear manufacturers, signed an agreement acceding to every demand of the union. They employ about 400 girls.

Jacob Golland, one of the first manufacturers hit by the strike, filed a voluntary petition in bankruptcy today, with liabilities exceeding assets by more than \$100,000. Free coffee and soup kitchens have been opened throughout the city by the women's trade union league.

Puts Repeal of Tolls Exemption of U. S. Coastwise Ships Up to Senate

### ROOT INTRODUCES BILL AT PRESIDENT'S DESIRE

Sims (Democrat) Has Similar Bill In House—Bills Will Reopen Whole Matter

WASHINGTON, Jan. 15.—President Taft and his administration have at last yielded to the demand of the British government and of eight transcontinental lines that American coastwise ships shall not be exempt from tolls in the Panama canal.

Acting directly for the administration Senator Root yesterday introduced a bill in the senate to repeal that portion of the canal bill which provides for such an exemption, and expunging the words that later on in the same act, grant discrimination in favor of American ships in fixing the tollage dues.

This surrender to the British government and to the railroads is complete. By this method, however, the president avoids the responsibility of taking action himself, and still is enabled to claim credit for having the bill passed, when talking to those who favor an American canal for American commerce.

A bill almost identical with that introduced by Root has already been introduced into the House by Sims (Dem.) of Tennessee. Another railroad canal bill was introduced in the House yesterday by Representative J. Hampton Moore of Pennsylvania.

It was not, however, till Root dropped his bill into the hopper that the administration became distinctly identified with this effort to reverse its own ruling, and permit the railroads to have their own way with the canal.

The bill will be used as a pretext for reopening the discussion on the whole question. Senator Root gave notice that he would address the senate on his bill on January 21.

## MAJORITY FOR BEACH "DRYS" IS 1924

Long Beach Also Settled Other Vital Matters—Avalon Is Now "Dry" Town

LONG BEACH, Jan. 15.—A victory for the "drys" by a majority of 1924 votes; the city attorney required to devote his entire time to the duties of his office at a salary of \$1500 a year; the office of city assessor created with no salary provision and the state railroad commission given power to fix the rates and transfers of the street and interurban lines, are the results of the election held here on Monday last.

**Avalon Is "Dry"**  
AVALON, Jan. 15.—For the first time in the history of the ocean-girt little city of Avalon the doors of its grills and saloons and pool rooms will be closed within a few days, and Catalina Island will automatically become a dry island.

Catalina Island is in the same district as Long Beach and other dry cities, and while Catalina voted by a large majority in favor of the wet situation, the overwhelming vote of the drys on the mainland made the island prohibition.

Therefore when this law goes into effect within a short time, liquor will no longer be sold in Avalon, and the doors of its pool rooms and billiard halls will be closed and Avalon will see the "driest" summer season of its history.

#### WOULD BORROW FROM POSTAL SAVINGS FOR SCHOOL DISTRICTS

SACRAMENTO, Jan. 15.—As a memorial to congress, Assemblyman Shannon introduced a resolution proposing to permit school districts as well as banks to borrow from the postal savings funds, thereby reducing by half the interest now paid by schools for borrowed money. The bill was referred to the committee on federal relations. Only banks are now eligible to borrow from this fund, the interest being two and a half per cent.

## BOARD LETS CONTRACTS FOR TWO POLY HIGH BUILDINGS

Manual Arts and Fine Arts Structures To be up by Sept. 1—Cut Auditorium And Cafeteria Out

Last night the board of education let contracts to George C. Condon of Los Angeles for the erection of the manual arts building of the polytechnic high school group and to David Irvine of Riverside for the erection of the fine arts building.

The contract with Condon is to be for \$40,474; that with Irvine, \$36,000. These contracts do not include plumbing, electric wiring, painting and heating and ventilating plants.

When the school board met last night some dozen or fifteen employees in the various bids received a week previous were in the outer office. When the school board began its session the door between the inner office, where the board was, and the outer office was closed, and the contractors took that as an invitation not to be present at the public meeting of the board, for the meeting was public, the law making it mandatory that the meetings of the board be public.

The members of the school board took up the discussion of the situation, which in short was that the lowest bids received under the bids offered would make the entire group cost \$207,000, when the board had but \$160,000 available for the buildings. Friday night it was concluded to leave out the cafeteria building at this time and to cut off the auditorium from the administration building.

"I think the thing for us to do," said President Duggan, "is to let the contracts for the fine arts building and the manual arts building and go right ahead with this polytechnic high school. We can put up the administration building without the auditorium. At some future time there will have to be some more bonds voted for the auditorium and cafeteria. It will be up to the pupils who use the high school to urge their parents and friends to vote for those bonds so that they can have the cafeteria and auditorium."

Principal McMath of the high school said that the school could get along without the auditorium at present.

Architect Withey stated that he would have his plans for the administration building revised in a day or two so that advertisement for new bids for that building could be begun at once.

On Director Dean's motion it was decided to let the contract to David Irvine of Riverside for building the fine arts building, at \$36,000, with casement windows. The next motion was to accept Condon's bid for the manual arts building, casement windows to be used, at \$40,474. Condon was \$349 under the next lowest bidder.

Irvine was present last night. Condon was not. Irvine was called in from the outer office, and arrangements were made for the drawing of the contract by City Attorney Heathman. Irvine is to give the usual bonds, one being fifty per cent of the cost price to insure materials men and laborers against loss and the other for twenty-five per cent of the cost price to the school board for faithful performance. Irvine stated that his bond would be in the Maryland Casualty Co. He said he thought he could complete the building by Sept. 1. He was willing that the contract state that the building be completed by that time. He said he would commence work immediately after the contract is signed and the bond given.

There was considerable discussion concerning the proposal to have the heating plant installed by the city water works department. It was said the city would install the system at actual cost with a little add-on, but

## SPEAKER YOUNG ANNOUNCED ASSEMBLY COMMITTEES TODAY

SACRAMENTO, Jan. 15.—Speaker Young has announced the Assembly committees. Among the important chairmanships are: Banking, Roberts of Los Angeles; commerce, Inman of Sacramento; corporations, Fish of Los Angeles; elections, Bohnett of San Jose; asylums, Cram of San Bernardino; municipal corporations, Scott of San Francisco; revenue and taxation, Sutherland of Fresno; roads and highways, Gabbert of Ventura; universities, Gates of Los Angeles; ways and means, Chandler of Fresno; irrigation, Murray of Yolo; engrossment and enrollment, Moorehouse of Imperial.

Other committee chairmen are: Assembly attaches, Smith of Alameda; building and loan associations, Hayes of Santa Clara; civil service, Bloodgood of Los Angeles; claims, Nolan of San Francisco; conservation, Carey of Fresno; constitutional amendments, Clark of Alameda; contingent expenses, Farwell of Los Angeles; contested elections, Gelder of Berkeley; county government, Woodley of Los Angeles; drainage, Morganster of Alameda; education, Wylie of Tulare; engrossment and enrollment and Federal relations, Johnson of Contra Costa; fish and game, Guilt of Butte; insurance, Kuck of

no one knew what the cost would be. A committee of the school board will talk the matter over with the City Trustees next Monday evening. Withey said \$9000 or \$6000 would be saved in installation. There was some talk in favor of a hot air system.

Director Cain said he understood that it is the custom of general contractor in figuring out his bid to add ten per cent to the figure turned in by a sub-contractor, and if that is the case he thought the school board would do well to let the contract for the administration building in as many contracts as possible, and thus save the ten per cent on the sub-contracts.

"For instance," said he, "if the sub-contractor's price for plastering is \$9,000, we would save \$900."

Architect Withey said the percentage added generally ran from six to ten per cent.

It was suggested that having too many contracts would create confusion for the school board.

"The same confusion must exist for the general contractor," said Mrs. Norman, "and I see no reason why we should not be able to handle the matter."

Decker, superintendent of building operations for the school board, stated that in his opinion the school board would do far better to let the whole thing in one contract, that that is the way he would handle it if it were his own private business.

"In these bids," said he, "I am quite certain that no percentage was added to the sub-contracts, for in some instances I saw the figures submitted by the sub-contractors."

There was some complaint voiced to the effect that the city water authorities or committees had stated that water would be furnished the city schools at half the regular rate, whereas the department is actually charging two-thirds the usual rate. No action was taken on the matter.

It was concluded not to take any action on the lesser contracts for any of the buildings. The architect stated that with some of them, even for the two buildings for which the general contracts were let last night, new bids would have to be received.

The proposed change in the heating plant would make an entire change there. Leaving out the cafeteria would make a considerable change in the electrical distribution to the other buildings.

The city attorney said he thought the plumbing contract for the administration building could be let on the bids already received, for the reason that leaving off the auditorium would make no great changes in the specifications. He said that if there were many changes to be made, new bids would have to be received.

The bids on painting, wiring, etc., were not acted on last night, and no decision was reached as to whether or not new bids would be called for.

**Other Matters**  
It was concluded to install new drinking faucets at Washington, McKinley and Roosevelt schools so that the amount of water used will be less than now. Superintendent Cranston was instructed to see the water superintendent in regard to the rate being charged the city, and if possible have the rate established at one-half the rate charged individuals.

Miss Lois Tedford, who has been ill, was given a leave of absence. Her position as teacher of the fifth grade at Jefferson school was filled by the appointment of Miss Vina Peterson.

Superintendent Cranston was instructed to install a piano in Spurgin school at a cost of \$140. He was also instructed to see to the grading of the grounds of the school.

#### WOULD HAVE CONGRESS IN STALL TELEGRAPH SYSTEM CONNECTION POSTAL DEPT.

SACRAMENTO, Jan. 15.—Senator Brown of Los Angeles introduced a joint resolution calling for congress to establish a telegraph system in connection with the postoffice department. The resolution declares that because the postal system is not taxed the government could provide cheaper rates and better service,

## CRISIS NEAR IN BALKANS AFFAIRS

Sunday Likely To See Resumption of War As Turks Believed To Be Standing Pat

### AMBASSADORS CONFER AS TO THEIR FINAL NOTE

Allies Concede Point—Ferdinand Visits Tchatalja to Consul Commander Sabaff

LONDON, Jan. 15.—Unless Turkey recedes immediately from her belligerent stand diplomats believe the Balkans war will be resumed Sunday. Premier Daneff of Bulgaria does not expect the Turkish Porte to recede from its position or that the prospective Ambassadorial note to the Sultan will prevent a renewal of hostilities. The Balkan envoys are prepared to leave London immediately when the time for the Turkish reply expires.

The foreign Ambassadors are in conference today but are not expected to reach a decision regarding the contents of their final note. It is learned from semi-official sources that the allies have agreed to have the powers include Scutari in the proposed Albanian autonomy.

#### CZAR FERDINAND AND ADVISERS START ON TRIP TO TCHATALJA

LONDON, Jan. 15.—A Sofia dispatch confirms the report that Czar Ferdinand and his advisers started at midnight for Mustappa Pasha to consult Gen. Sabaff, commander of the Bulgarian army, about Tchatalja. This is believed to indicate that the allies are in earnest in their declaration to resume war when the powers present their final note to Turkey.

Reschid Pasha, the leading Turkish envoy, conferred for a long time today with the German Ambassador.

## POLICE JUDGE HISSED BY WOMAN

His Action In Lowering Bail of Prisoner Who Harmed Girl May Result In Recall

SAN FRANCISCO, Jan. 15.—Rudolph Spreckels, millionaire, today promised to support the club women of the city in their effort to secure the recall of Police Judge Weller, who reduced the bail of Prisoner Albert Hendricks, an automobile dealer charged with a statutory offense against a young girl, from three thousand to one thousand dollars. The prisoner furnished the latter sum and then left the state.

The meeting at which Weller was publicly denounced was held yesterday in the auditorium of St. Paul's Presbyterian church near the ocean beach. Among the speakers, all of whom denounced Judge Weller and his alleged practices, were Miss Isabelle Munson, secretary of the San Francisco Women's Civic Club; Miss Mary Fairbrother, president of the Women's Political League, Rev. R. L. Webb, and a representative of the Juvenile Protective Association.

At the close of the meeting the first petition for the recall of a judge in California was put in circulation and was eagerly signed by the women present. It was stated that an energetic campaign would be made to obtain sufficient votes for a special recall election.

The scene in the auditorium was an exciting one. Weller's defense was greeted with such a storm of angry cries and hisses that he hastily left the platform.

#### MONTANA LEGISLATURE ELECTS THOMAS WALSH TO THE U. S. SENATE

HELENA, Mont., Jan. 15.—Both houses of the Montana legislature met jointly at noon and ratified the election of Thomas Walsh as United States Senator, succeeding Senator Dixon. He received every vote.

## "PRACTICAL EDUCATION IN AMERICA", EDUCATOR'S THEME

Principal McMath Advocates Vocational Side of Education as Adopted to Conditions of Today

Before the Monday Club on Monday night, Principal E. H. McMath of the high school read the following paper on "Practical Education in America."

The belief in education has, in America, become almost a religion. Almost miraculous powers have been assigned to it by some of its devotees. Our fathers were convinced that it would reform all the criminals and solve the greater portion of the problems of state. Its bill of expenses is larger than any other item of expenditure within the nation. Beginning with the enrollment of the sons and a few of the daughters of the well to do, the field of the school has been broadened, until now, not only are the select invited, but the children of all the people are in a number of states compelled to spend a large fraction of their time within the walls of the school room.

If the question were put to the American people, whether they believe in practical education, the answer would come back with scarcely a dissenting vote. Yes, American education has always had for its major aim, especially at the inception of each new department or departure from the Practical. But when you ask men what they mean by the practical you get a wide diversity of opinion. Each is a law unto himself. The business man feels that nothing is so practical as a knowledge of the three "R's." He sees the need for good plain writing, rapid calculation, neatness, and accuracy. To the machinist manual dexterity seems the essential thing, with perhaps some skill in manipulation of formulae. The engineer deems mathematics, with its applications, about the most practical thing. To the lawyer, these seem impractical and he sets up some other standard by which the practicability or worthlessness of an education should be measured. The business colleges, so-called,

## IF HEADACHY, BILIOUS, CONSTIPATED AND NERVOUS TAKE DELICIOUS "SYRUP OF FIGS"

Gently, but thoroughly cleans and regulates your disordered stomach, inactive liver and 30 feet of bowels without griping, nausea or weakness.

A harmless cure for sick headache, for biliousness, for a sour, gassy, disordered stomach, for constipation, indigestion, coated tongue, sallowness, pimples—take delicious Syrup of Figs. For the cause of all these troubles lies in a torpid liver and sluggish condition of your thirty feet of bowels.

A teaspoonful of Syrup of Figs tonight means all poisonous waste matter, the undigested, fermenting food and sour bile, gently moved on and out of your system by morning, without griping, nausea or weakness. It means a cheery day tomorrow—many bright days thereafter.

Please don't think of gentle, effective Syrup of Figs as a physic. Don't think you are drugging yourself, for luscious figs, senna and aromatics can not injure anyone.

This remarkable fruit preparation is a wonderful stomach, liver and bowel cleanser, regulator and tonic, the safest and most positive ever devised.

The day of violent purgatives, such as calomel, pills, salts and castor oil is past. They were all wrong. You got relief, but at what a cost! They acted by flooding the bowels with fluids, but these fluids were digestive juices. Syrup of Figs embody only harmless laxatives, which act in a natural way. It does what right food would do—what eating lots of fruit and what plenty of exercise will do for the liver, stomach and bowels.

Be sure you get the old reliable and genuine. Ask your druggist for the full name, "Syrup of Figs and Elixir of Senna," prepared by the California Fig Syrup Company. Hand back, with scorn, any Fig Syrup imitation recommended as "just as good."

10 cents and 15 cents NONE HIGHER.

But by and by the cheap land was taken up. There was no longer a West. Competition became keener. Factories took from the home the greater portion of the industries that had formerly belonged to it. The father and older brothers no longer spent their days at home, but at the factory. Next the sisters left the home for the office and the factory. As a result of this there is nothing for the boy and girl to do at home. Instead of seeing all the processes of cloth making, or of flour making, only too often the first child sees is the loaf of bread or the ready to wear clothing in the shops. The youth receives in the home no training for independence as a man or woman. There are no chores to do. Along with these changes have come other changes in methods of manufacturing. The small factory with the personal relations between manager and owner, where the man knew from experience or from observation every step in the process in the making of a shoe has gone. In its place has come the great factory with its hundreds of operatives, where each man does only one little part in the process and knows nothing of the remainder of the steps of manufacture, where he knows nothing of the art and feels no personal responsibility for the product, where he is little more than a machine in the performance of his minute portion of the process and where he may at any time be replaced by some machine which can do the automatic work more quickly and more accurately. The old apprentice system has broken down and there is no opportunity for the modern boy or girl to learn the trade as a whole. All of this, while temporarily wonderfully efficient, is now no more practical than Algebra or History. It gives a sort of culture to anyone who may take it, but it is no more likely to aid one directly in earning a living than either of the other subjects I have named.

These are but three examples selected from a great number that might have been mentioned. They may serve to establish my third doctrine; that either because of changing conditions outside of the school, or of the manner of teaching a subject within the school itself, what was once practical may later become impractical, to the great majority.

Let us recapitulate. We have briefly indicated:

1. The American people believe in practical education, but disagree as to what is practical.  
2. All American education has had for its major aim, especially at its inception, or at the beginning of a new department or departure, the practical.  
3. Either because of changing conditions outside the school or of the character of instruction within the school, what was once practical may become impractical.

The subject of my paper is, Practical Education in America. It is not my purpose to argue for or against the practical as opposed to the cultural, because as indicated above owing to constantly changing conditions the cultural of today is the practical of yesterday and the practical of today will doubtless be the cultural of tomorrow. Within the limits of this paper I shall attempt merely to indicate some of the tendencies which have caused a stronger emphasis to be laid on the vocational side of education, together with a reference to what some communities are attempting along certain typical lines.

As Cubberley has pointed out in his monograph, "Changing Concepts of Education," in the early days the family was a self-supporting unit. The pioneer foraged for his meat, raised the grain for that part of the diet, sheared his sheep, chopped his wood, built his house, and did the thousand and one things for himself for which we of this day depend on society. Within the home every member had his duty to perform. The flax and the wool must be spun, the cloth woven, the clothing made, the meal ground, bread baked, butter and cheese made, all within the home. The boy and girl learned within the confines of the home all that was necessary to the earning of a livelihood. When the lad became a man he would push on to the West, take up some of the government cheap land, start all anew, and so it went. The school was called on to give only the mere essentials. Short terms, with the teacher boarding round, ungraded schools, with the whole neighborhood attending were the character of the school.

Against this tendency there are many interests which are raising their notes of protest. Labor objects not only through the strike but through a campaign of education. The American Federation of Labor has committees investigating conditions, with the hope of instituting trade schools. Capital sees that with the deterioration of its workmen the efficiency of the plant is endangered. It seeks some way of overcoming the danger. The State is interested, for a nation to compete with the nations of the world for its place, must be prepared to compete industrially. The battles of the twentieth century are being fought with the loom and the steam engine. Balances of trade count for more than the number of battleships. Germany has accomplished wonders as a nation through her improvement of the German workman. The social worker is interested. He sees hundreds of young men sent to jail because of crimes committed which would not have taken place had the man been able to make a living. The jails and reform schools have discovered that one of the first steps in the reform of the individual is to make him self-supporting. For that reason every person committed therein is taught a trade. There is too much truth in the assertion that for a young boy or girl to receive a free education in a trade he must first commit some crime. The state will then teach him to be self-supporting.

As we have indicated above it is not within the province of this paper to argue for or against the methods that are being employed, not to argue for or against the vocationalization of the elementary and secondary course of study. This paper is intended simply to indicate what the writer believes to be the trend of the times, together with a brief account of some individual undertakings along the lines indicated.

We have now stated the problem and are ready to narrate some of the attempted solutions. But before we take up this section of the paper let us again review the ground covered.

1. Definition of Practical Education.

1. The American people believe in practical education, but disagree as to what is practical.

2. All American education has had for its major aim, especially at its inception, or at the beginning of a new department or departure, the practical.

3. Either because of changing conditions outside the school or of the character of instruction within the school, what was once practical may become impractical.

2. The Present Need for Practical Education.

1. Changing conditions have by throwing the work from the family into the ever enlarging and consequently ever more minutely specializing factory deprived the boys and girls of the opportunity to learn a trade.

2. There are among others four interests seeking to ameliorate conditions, each looking at the problem from its own angle.

(a) Labor.  
(b) Capital.  
(c) The State.  
(d) The philanthropist.

For convenience of discussion we shall throw into three classes all the various attempts to vocationalize the instruction of the school. First, the attempt of the existing institutions to meet the demand through a reorganization of the existing course of study. This is being met in two ways, first by a retention of the eight year elementary curriculum and the four year secondary course, and second, by a reorganization of the twelve year period. Various plans are suggested for this. Second, the attempts of the schools to meet the problem in conjunction with various industrial organizations; and third, the institutions organized by great corporations themselves for training of employees.

First. The attempt to reorganize the existing course of study with the retention of the familiar eight and four year periods. Cambridge, Massachusetts, has for a number of years arranged the work of the last six years of the elementary school in three ways, four, five, and six years, and started classes along each of them, with frequent opportunities for transfers from one to the other. This permits children to complete the work of the elementary school in one or even two years less time than usual, and without the skipping of a grade. Portland, Oregon, divided the course into 54 parts, and then assigns three or four parts to a half year's work. There will be in one room two sections, one working on three and the other on four parts. Thus every year and a half there is opportunity for transfer from the three part course to the four part course or vice versa according to the ability of the child. This gives opportunity for the shortening of the time spent in school without skipping any grades. Gary, Indiana, has a unique plan. The work is classified as regular and special. Each student has in each half day both regular and special, alternating. The departmental plan is employed. In the special studies are included Music, Drawing, and Manual Training, Literature, Nature Study, Physical Culture.

These are but three of numbers of examples of reorganization that might be cited. In thousands of other schools where no definite reorganization of the course has been undertaken, within the individual studies reorganization has taken place and new emphasis has been laid on the practical portions, parts of certain studies, especially Arithmetic has been omitted entirely, and all in the attempt to make the school more practical.

We shall now mention two or three reorganizations which involve the disrupting of the traditional 8 and 4 year periods in elementary and secondary education.

Berkeley, Calif., gives six years to the elementary school; three to the lower high school, and three to the upper high school. Graduation from each group promotes to the group next higher, but the course of study for each is so drawn that each aims to prepare the student in a measure for life if he should go no higher. Of course the elementary seeks to ground him in reading, writing, spelling, arithmetic, history and geography. The lower high school gives a chance for choice at the end of the ninth year may elect commercial or trade school work. (To date the trade school work is offered in but very slight extent, while the one who is to go on to upper high or to college may begin the study of a foreign language and of higher mathematics, thereby getting an earlier start in that direction. The upper high school offers a continuation of the technical, commercial, and college preparatory work began in the lower high school. This reorganization has had excellent results in housing boys and girls for another year or so of school.

Concord, New Hampshire, reorganized her system into three units or groups, "which are numbered in the reverse order of the grades or years at school." Group 3 comprises the first six years; group two, the seventh and eighth, and group 1, the ninth, tenth and eleventh or high school proper. The attempt is made to complete the whole series in eleven years, the superintendent maintaining

in practical education, but disagree as to what is practical.

2. All American education has had for its major aim, especially at its inception, or at the beginning of a new department or departure, the practical.

3. Either because of changing conditions outside the school or of the character of instruction within the school, what was once practical may become impractical.

2. The Present Need for Practical Education.

1. Changing conditions have by throwing the work from the family into the ever enlarging and consequently ever more minutely specializing factory deprived the boys and girls of the opportunity to learn a trade.

2. There are among others four interests seeking to ameliorate conditions, each looking at the problem from its own angle.

(a) Labor.  
(b) Capital.  
(c) The State.  
(d) The philanthropist.

Heals Everything Healable. Burns, Boils, Sores, Ulcers, Piles, Eczema, Cuts, Corns, Wounds and Bruises. 25 CENTS OR MONEY BACK. 25c AT ALL DRUGGISTS.

## DIRECTORS OF BOARD CHOSEN

Chamber of Commerce to Organize Tonight For Work of the Coming Year

No Opposition to Re-election of Metzgar, Who Has Made Good as Secretary

The annual election of the Santa Ana Chamber of Commerce yesterday resulted in the election of the following: George B. Shattuck, manager and owner of the Tustin Packing Co., shipper of oranges and lemons; A. H. Lyon, orange grower; F. H. Chase, president of the Southern California Sugar Co.; J. D. Thomas, orange buyer and shipper; H. J. Forgy, attorney; H. T. Rutherford, assistant cashier of the Farmers & Merchants National Bank; W. A. Zimmerman, president of the Orange County Savings & Trust Co.; E. L. Vegely, city assessor; Fred Rafferty, florist and nurseryman.

Of these, Chase, Thomas, Zimmerman and Vegely served as directors the past year.

Tonight the old board of directors will meet and complete its business. Immediately afterward the new board will meet and organize by the election of officers for the new year.

Eighty-eight votes were cast in yesterday's election, the greatest number ever cast in a Chamber of Commerce election here.

There is no opposition to the re-election of J. C. Metzgar as secretary of the organization. Metzgar has made good in the position.

## DRINK HABIT

RELIABLE HOME TREATMENT

Thousands of wives, mothers and sisters are enthusiastic in their praise of ORRINE, because it has cured their loved ones of the "Drink Habit" and thereby brought happiness to their homes. Can be given secretly. ORRINE costs only \$1.00 per box. Ask for Free Booklet, Hatzfeld & Parsons' Drug Store. Advertisement.

## Underwear

We study the underwear question and appreciate the different requirements of different men.

Some men want wool or nothing. Others wouldn't and couldn't wear wool at all.

So we provide the best in all different kinds of underwear.

Mercerized Cotton, Merino, Natural Wool, Cashmere, Lambs Wool, Etc., Etc.

Splendid values at 50c to \$1.50 the garment.

## Union Underwear

We've the best makes of union underwear, in all the different textures.

\$1.00 to \$3.00 the Suit

The man that is always troubled in getting satisfactory underwear, can be relieved here.

## LIVE NEWS GATHERED FROM NEARBY TOWNS

### FULLERTON

## ARE LOOKING FOR GUSHERS

Much Development Work Is Being Done In the Fullerton Field

FULLERTON, Jan. 15.—There is much development work under way in the Fullerton field, especially in Brea canyon.

On the Brea Canyon Oil Company's lease, well No. 11a is down 2300 feet with twelve-inch casing. This hole has gone down through oil sand since a depth of eighty feet was reached, and local experts predict that the well will be a gusher. No. 12a, on the same lease, is down 1975 feet, with nine and five-eighths casing, and is in "hard-shell" oil sand, but is not showing up as good as No. 11a. It is believed, however, that it will make a good producer. The company is pumping twenty-seven wells, with an output of over 40,000 barrels per month. It has a rig up for No. 28 and is getting material for No. 29.

The Birch Oil Company, on the old Menges lease in Brea canyon, is drilling four wells. No. 8 is down over 3500 feet and is about ready to come in. No. 5 has been drilling for over three years. At one time it was down 2900 feet, but "went back" when the tools and casing were lost in the hole. It is again down 2500 feet. On good authority it is reported that the output on this lease is between 80,000 and 90,000 barrels per month.

The General Petroleum Company has been drilling on two wells over six months and has one hole down about 3000 feet. It is using the rotary with fair success.

The Union is not drilling in Brea canyon, but is pumping about seventeen wells.

Over 5000 worth of water pipe, on top of the ground in the Brea canyon district, burst on account of the cold weather.

**ORIGIN OF DIFFERENT WORDS**  
Common Slang Term "Mash" Is From Gypsy Word, "Mafada" Meaning "to Charm by the Eyes"

"Pow-wow" comes from the North American Indians.

The word boss comes from the low Dutch and means master.

Kidnap comes from the napping of a kid, gypsy for child.

Calaboose, a prison; picaroon, a pirate; palaver, to talk, are all Spanish.

"A rum chap" is simply a gypsy lad; it has no relation to the product of the still.

Pal is a brother, and "conk," for nose, comes from the spouting fountain, the concha of the Romans.

Demijohn comes from the Arabic lamazhan, itself taken from the Persian glass making town of Demaghan.

The common slang word "mash" is from a beautiful gypsy word, "ma-fada," which means "to charm by the eyes."

Why should a man be called a spoon? Why spoony when he is making love? Simply because he is a "foolish," which also means spoon.

A tinker's dam has nothing to do with swearing. It is merely the dam or stoppage, made of flour and water, with which the tinker stops the gap he is mending until the tin or the pewter he is using has cooled.

### NEWPORT BEACH

## DISTRIBUTION BY THE CITY

Newport Beach Trustees Decided on Sudden Change in Electric Light Plans

NEWPORT BEACH, Jan. 15.—The electric light situation in this city took a sudden change Monday evening when the Board of Trustees decided to build a distributing system out of the general fund and buy juice at wholesale from one of the big power companies. Negotiations have been going on for some time between agents of this city and one of the largest power companies in the state with a result that the company has offered to furnish electricity to the city on a twenty-four hour basis.

The city recently voted bonds in the sum of \$25,000 to acquire an electric light plant. C. H. L. Griest, manager of the local plant, put a price of \$22,000 on his property, which was considered prohibitive by the trustees. Griest then sought to prevent the sale of the bonds by an injunction in the Superior Court of this county, but the city's demurrer to the injunction was sustained. Griest's attorney, Emmet H. Wilson, is now preparing to take the case to the Appellate Court.

The city will this week advertise for bids on poles, wires, transformers and other materials that go to make up a distributing system, the City Clerk being instructed to that effect at Monday's meeting.

## FOR A BAD STOMACH PAPE'S DIAEPSIN

Time It! In Five Minutes Gas, Sourness and Indigestion Is Gone

Sour, gassy, upset stomach, indigestion, heartburn, dyspepsia; when the food you eat ferments into gases and stubborn lumps; your head aches and you feel sick and miserable, that's when you realize the magic in Pape's Diaepsin. It makes such misery vanish in five minutes.

If your stomach is in a continuous "revolt—if you can't get it regulated, please, for your sake, try Diaepsin. It's so needless to have a bad stomach—make your next meal a favorite food meal, then take a little Diaepsin. There will not be any distress—eat without fear. It's because Pape's Diaepsin "really does" regulate weak, out-of-order stomachs that gives it its millions of sales annually.

Get a large fifty-cent case of Pape's Diaepsin from any drug store. It is the quickest, surest stomach relief and cure known. It acts almost like magic—it is a scientific, harmless and pleasant preparation which truly belongs in every home.—Advertisement.

**Improved Standard of Living**

New York Tribune: We may call it luxury or we may call it simple convenience, but there is no getting away from the conviction that the thing itself—to wit, the modern method of doing retail business—is an essential and considerable factor in the increased cost of living. It is not the only factor. It is notorious that in some important respects supply has remained stationary, or has actually decreased, while demand has largely increased; and the old law of supply and demand is not so obsolete that it does not operate in such a case as that. But the manner in which business is done, and particularly the manner in which consumers are waited on and served by tradesmen, must count largely in the problem.

Years ago a housewife went to the butcher's with a basket and carried her purchases home, wrapped in brown paper. Now she telephones to the marketman, or has a messenger to her house to receive her orders, and the goods are sent to her in a paraffined or a sterilized wrapper and in an automobile delivery cart. The telephone, the messenger boy, the wrapper and the cart and its driver must all be paid for by the consumer. Soda crackers in an ornamental lined box cost more than those sold in bulk from a barrel. Lard in a sealed tin pail or butter in an ornate packet must be more expensive than if used to be when scooped up from a tub and dropped into the crock which the housewife sent or took to the shop for it. So with a hundred other articles. They are stored, packed, sold and delivered in much more expensive ways than they were, and the additional expense comes out of the pockets of the consumers.

In some respects it is a luxury. In some it is a convenience. In some it is sanitation. In some it is simple neatness and cleanliness. But whichever it is, we greatly doubt if the average consumer, even the one who grumbles most at the increased cost of living, would willingly go back to the old order of things, even if by so doing prices could be put back to the old figure. People have become accustomed to the new ways, and now regard as necessities of service things which their grandparents would have stared at disapprovingly as vanity and extravagance. But if they insist upon continuing to enjoy them, they will have to be reconciled to the cost.

### NEWPORT BEACH

## NEW HYDROS ON THE BAY

Newcomb Is Setting Up Machine—Martin Arrives With a New Plane

NEWPORT BEACH, Jan. 15.—Ralph A. Newcomb is setting up a Wright hydro-aeroplane at the East Newport Garage, which he will try out on Newport Bay. Newcomb rode across the continent from San Francisco to Pebble Beach, Fla., with Robert Fowler, and afterward purchased the machine which he has equipped with two pontoons, the combined weight of which is only 147 pounds.

Glenn L. Martin brought back to this city today another hydro-aeroplane made up of parts of the one destroyed near San Pedro on December 21, while Martin was in search of Kearney and Lawrence. The engine in the new machine was saved from the wreck but most of the framework had to be built anew. Martin has his shop on Balboa Island in which he will experiment with a self-starting device nearly completed and work has been started on his school near the South Coast Yacht Club, at East Newport.

### AMUSEMENTS

**"GOING SOME" TOMORROW NIGHT**  
A Large Audience Will See the Comedy

Tomorrow night at 8:15 the curtain will rise on the first act of Paul Armstrong's comedy "Going Some." The sale of seats for this first performance at the Grand Opera House has been very large. The many friends of the players will be hand in full force to help make the performance a rousing success. After more than a month's careful rehearsing under the guidance of Herman Reuter the play has been adjusted so that the entire affair goes like clock-work. There is not a weak spot in the cast. The characters are all played by people who are especially adapted for them.

George (Pete) West plays Speed, the would-be athlete, in a way which makes it certain to all that no one else could do it just as well. William F. Menon is unconsciously funny as "Larry" Glass, the trainer. Mr. Menon and Mr. West are on the stage together the greater part of the time and the contrast in size between the two is of itself sufficient to arouse the risibilities of the most stolid audience.

The Berkeley Fresno which Mr. Royce W. Lantz shows us is another funny bit. His ludicrous attempts to sing "Dearie," his jealousy of Speed and his love making will win all hearts. The part of Culver Covington is in the hands of Mr. Herman Reuter. He is required to be on crutches during the time he is on the stage and this, of course, helps the fun along. Jack Chapin, owner of the Flying Heart ranch, is played by Mr. Claire Buchanan in a very spirited manner. As is absolutely the case with everyone in the cast Mr. Buchanan can be heard in the most distant parts of the house and this without yelling. Jeanne Chapin is played by Miss Hattie Powers. Jeanne is Chapin's sister and Miss Powers acts the character very charmingly indeed. Florence Thayer McClay is Helen Blake, Jeanne's friend. The part of Helen Blake is on the light comedy order and is one that is admirably suited to Mrs. McClay.

Miss Elsie Morrow is a delightful Mrs. Roberta Keap, Helen's chaperon. Miss Morrow has a charming voice and a gracious manner and her rendition of the character of Mrs. Keap will leave nothing to be desired. Mr. E. L. Roberts makes a hit as Bill Stover, the foreman of the Flying Heart. Mr. Roberts uses a sort of nasal twang in playing the part of Stover and those who do not laugh just to hear his voice had better consult a specialist.

Mr. Arthur Collins is fiery and fierce as Carara, the Mexican. Mr. C. A. McIntire, as Willie, the "tough" cowboy who "uses his gun as National Cash Register to tally his dead" is bound to convulse everyone. Mr. Carl Campbell plays Cloudy, the Indian football player from Carlisle. "Ah Sing Ho, the cook at Flying Heart, is in the hands of Mr. Roy West. Miss Emily West, the Mexican servant, plays the part in a way so that we can readily understand why Carara falls in love with her. "Gabby" Gallagher, the foreman of the Centipede ranch, is done by Mr. Victor Walker. Skinner, the cook at the Centipede, is in the hands of Mr. Roy Peterson. What with his bald wig and his turned up nose Mr. Peterson will do much to make "Going Some" a hilarious occasion.

Those who have seen the rehearsals of "Going Some" all agree that the comedy will be the best staged and most capably acted amateur play ever given in this city. The prices are 25, 35 and 50 cents. Seats on sale at Rowley Drug Company. Remember that the curtain will rise, for the first performance, tomorrow night, at 8:15, sharp.

**Mother Warned In Time**  
An unusual occurrence took place at Notgrove, Gloucestershire, England, recently. A boy of two and a girl of three were playing beside a large trough, when the boy fell into the water. The little girl ran to the boy's mother and in lisping tones said: "Babby in water." The mother ran to the trough, took the boy out, and with assistance brought him round.

## MRS. EVERETT READY TO TAKE THE BABY

Los Angeles Examiner: "Take my baby."

This heart-broken plea, uttered in heart-broken English by the twenty-year old Hungarian mother, who walked in to the Police station last Wednesday afternoon, and offered to give her baby away because she could not feed it, has been answered by Mrs. Sarah F. Everett of Santa Ana. The girl-mother came to this country six years ago and arriving at New York she was met by her girlhood sweetheart. They were married soon after. They came to Los Angeles, and it was upon the arrival of the third child that her husband deserted her and, failing to find work and unable to feed her baby because of lack of adequate food, the Hungarian mother offered to give it away to anyone who would care for it.

Mrs. Sarah F. Everett, of Santa Ana, reading this story, writes as follows:

"Editor Examiner: I was deeply interested in the account I saw of the little Hungarian woman who feels compelled to part with her infant child. I should love dearly to have the child. She need not give it away, but if she sees fit I will keep it for her and if there comes a time when she thinks she can care for it, and wants it back again, I will give it up. If it should be desirable that I should take the infant I would come to Los Angeles and get it and the mother should sometimes come and see it. If the mother should see fit to place the child in my keeping let it be known; if not I will suppose that she has a desirable place nearer by. I live in the Alamitos settlement two miles west of Garden Grove; am a

## FUNERAL HELD FOR VICTIM OF SHOOTING

The funeral of Alexander A. Prater, who died on last Saturday night from the effects of a gun-shot wound he received in the fight with the desperado on December 16 at Tomato Springs, was held yesterday afternoon from Mills & Winkler's chapel at 2 o'clock. Interment was at Santa Ana cemetery, word having been received from his father who lives at Katemey, Texas, to bury his son here.

The pall-bearers were City Marshal Sam Jernigan, Constable C. E. Jackson, William Jeffrey, Arthur Robinson, and Ben and William Jerome. There was a large attendance, and considering Prater was practically a stranger in the community, he coming here from Texas a year ago, the many flowers in evidence testified to the esteem in which he was held for his sacrifice and bravery.

Rev. W. L. C. Samson of the United Presbyterian Church conducted the services and in a few well-chosen words paid a glowing tribute to his bravery and sacrifice in the cause of law and righteousness. During the services Miss LaRue Fipps sang a solo.

W. A. Cook, by whom Prater was employed, Hugh McDonald and other friends of Prater and men who took part in the hunt for the desperado, took charge of arrangements here. The funeral was impressive.

Well Written Up  
"What do you think of the world's series?"  
"Haven't got through reading about it yet. I've read what the red-blood novelists and the dialect poets have to say, and am just getting round to the essayists and analytical high-brows."

### FOR MUSIC IN COLLEGE YELLS

Isn't this lovely! There is a plea issuing from one of the college centers for the use of harmonious tunes in college yells, instead of the "ear-racking and head-splitting discords now in use." This prayer was made by Leonard B. McWood of Drew Seminary, in a discussion before the Music Teachers National Association, at the thirty-fourth annual convention at Vassar College.

Now this amendment to the usual husky cry of "Rah, Rah," and the supplemental rhythmic addendum, shouted in joyous disregard of time, if not of time, may appeal to the aesthetic sense. Yet it is doubtful if the true college spirit will be reached if the chorus of the bleachers, or those watching from the goal posts or the starting launch, are willing to attune their hoarse cries of get away and good luck, fraternal encouragement and almost demoniacal demonstrations of delight over victory, to a set form of bass and treble clef, two-four, or four-four time.

If these cries are to be, through the necromancy of a music master, made a symphony in G flat or E minor, then it is doubtful if the real spirit of the college yell will be maintained.

Few can sing—all can holler. Many can paint with the broad swathe of the barn decorator. But the strokes grow weak under the guidance of the artist in water color or pastel, who lays down principles which but few can grasp.

So if the real spirit of sport is to be encouraged and enlivened let boys—and girls, too—yell as they wish in any key, major or minor, harmonious only in the desire to spur their own college to victory.

### BUSINESS FRIENDSHIPS

When you walk into your office, it is often said that all considerations of sentiment or friendship must be left behind. There are great rewards, though, that come from developing business friendships, and particularly on forming trade associations with the business men of your own town.

A business man may feel that he saves a few cents by going to some distant city to place an order for some supply. Let him first look at what he has lost by giving his money to build up the town he never saw.

If he had ordered his supply at home, the bulk of his money would have remained at home, and would have helped to make other home industries prosperous.

Perhaps still more important than that, looking at things from a purely selfish consideration, is the fact that when a business man buys his supplies of a home dealer, he makes a business friendship that in most cases is very valuable. The man whom he has patronized will do anything in his power to return the favor.

A genuine business ally made for you in this way, is working for you in times when you know it not. People discuss the merit of this or that store far more than the merchant realizes. The business man who buys all his supplies at home whenever possible will find that he has a friend at court in many widely separated circles, who want him to succeed because the home community profits by his success.

If you want favors from the local government, if you want to stand well with the working classes, if you need accommodation in times of financial strain, you can't have too many friends at home who will say a word for you. The supply firm thirty-five or five hundred miles away never returns you one thing, except the smiles of its salesmen. Those don't count much.

### FARMERS AND CORNERS

The United States Supreme Court, having laid down the principle that corners in food, clothing material, etc., are in violation of the United States law, it remains to be seen whether the speculators can continue to gamble with the poor man's loaf of bread and cotton night shirt as the stakes.

While public sentiment is very generally against corners, some rather plausible arguments in their favor have always been advanced. It is said that they enable the farmers to get more for their cotton and grain, and that they prevent foreign countries from getting our crop supplies at too low prices.

But does the farmer get the benefit of corners?

What is the farmer doing when the storms of financial frenzy, resulting from attempts to corner the market,

break loose on the produce exchanges?

The history of these furies shows that the corner rarely happens until the farmer has disposed of most of his crop. At the time of the big attempt to corner the wheat market in 1909, it was claimed that but 21 per cent of the grain remained in the farmer's hands.

The farmer is pretty thoroughly impregnated with that ancient maxim of cold prudence, "Let well enough alone." When he sees the bulls pushing the price of his produce up to sky rocketing figures, does he hustle down to the telegraph office, and wire his agents to take a moderate profit? Rarely, so far as the information of this writer goes.

His instinct under such circumstances would seem to tell him to let the good work go on. He watches the operations of the brokers much as he watches the beneficent action of the rain and the sun on his fields, with the feeling that there is nothing he can do to interfere with any benefit to himself. He waits, hoping for still higher prices.

The history of these speculations suggests that the farmer does not usually sell until prices begin to waver and droop. By the time his order gets in, the psychological moment has passed, and much less is realized than could have been obtained a short time previous.

The great objection to corners is not merely that they raise the price to the consumer, but that they discourage the weaker mills and factories from buying raw material, leading to a general stoppage of manufacturing and milling.

### STILL MORE NEW YORK WOMEN FOR PARADE—WILL RIDE

NEW YORK, Jan. 15.—With a pretty bugle given in white to correspond with the color of her uniform, announcing their arrival, a troop of cavalry women will ride into the National Capital March 2 to take part in the big suffrage parade the following day. Mrs. Gus Ruhlman is organizing the cavalcade. The horsewomen will leave New York about ten days prior to the parade and will be joined by other cavalry women, including well-known suffragettes from New York, Trenton, Philadelphia, Wilmington and Baltimore.

"I am not fond of walking, so I did not care to join the hikers," said Mrs. Ruhlman. "And as I and several other women desired to ride in the Washington parade, we thought we might as well ride all the way."

"We expect to have at least 100 mounted suffragists in line when we ride into the capital."

Mrs. W. Kent, wife of Congressman Kent of California and a member of the Washington parade committee, was in town today consulting with New York women. It is expected that more than 2000 will go from here by train to swell the ranks at Washington.

"PRINCESS ALICE" MAY BE IN SUFFRAGIST PARADE  
WASHINGTON, Jan. 15.—It is reported in Washington that Mrs. Nicholas Longworth, daughter of Colonel Theodore Roosevelt, will ride in the "Petticoat Cavalry" in the suffragist parade March 3. Mrs. Longworth is not here and the story can not be confirmed, but it is believed by some of Mrs. Longworth's friends.

It is also said Mrs. Longworth has become an out-and-out suffragist since her father conducted the spirited Progressive campaign last fall.

### Could Shout For Joy

"I want to thank you from the bottom of my heart," wrote C. B. Rader, of Lewisburg, W. Va., "for the wonderful double benefit I got from Electric Bitters, in curing me of a severe case of stomach trouble and of rheumatism, from which I had been an almost helpless sufferer for ten years. It suited my case as though made just for me." For dyspepsia, indigestion, jaundice, and to rid the system of kidney poisons that cause rheumatism, Electric Bitters have no superior. Try them. Every bottle is guaranteed to satisfy. Only 50 cents at all druggists.—Advertisement.

## What Remains to Southern California

With the live stock and grain industries of the great central valley and the coastal plain badly damaged by two years of drought and the orange and lemon industries given serious setback by frosts two years in succession, there may be those who for the moment, in ignorance, will imagine this is a Waterloo for Southern California, but it is not true. There still remain, entirely undisturbed, the three greatest assets of Southern California. These are the climate, the oil industry and the reclaimed deserts. And it can also be said that the citrus fruit industry itself, crippled though it be, remains.

"An accident?" asked the Professor on the Nautilus of Captain Nemo when disaster faced them.

"No," the latter replied, "an incident."

Taking the frosts into consideration, it yet remains a fact that few crops produce with such regularity as the navel orange, and it is not believed that any large portion of the trees have been damaged.

But even conceding the terrible magnitude of the disaster which has probably destroyed nearly fifteen million dollars' worth of property in two nights, and conceding that all other industries and all sections of the state will help pay the damages, the fact remains that the three great assets alluded to will tide Southern California over the period of trial.

The fact is that climate is the greatest and most enduring foundation on which to build.

It was the climate which lured the

### 6,000,000 ACRES GRAZING LAND OPEN

Government Gives Homesteaders and Indians Free Grazing Privileges

WASHINGTON, Jan. 15.—Under a decision of the department of the interior, more than 6,000,000 acres of Indian lands in several western states have been thrown open to homesteaders and Indians for free grazing purposes. At the same time rates have been established under which cattle-men may use the lands for grazing and thus provide an income for the Indian owners until the lands have been sold.

The lands are designated as ceded Indian lands, and are scattered throughout Wyoming, Montana, North and South Dakota and California. Under the decision a homesteader will have the right to free grazing land for forty head of cattle or horses or 200 sheep, while the individual Indian may graze 100 head of cattle or horses or 500 head of sheep.

The lands may be used by cattle-men who have large herds at rates varying from 20 cents to \$1 a head for cattle and horses and from 40 cents to \$2.50 a head for sheep. It is proposed by these means to provide the Indians an income from the land, and also encourage homesteading. The contracts with the larger cattle-men provide for supervision by the department through the bureau of Indian affairs.

### Childhood Dainty.

To make "Aunt Mary's Franklin cakes" take one pound of sugar, three-fourths of a pound of butter, one-half teaspoon of milk, a scant teaspoonful of soda, a wineglassful of wine, brandy or rosewater; a teaspoon of nutmeg grated, the same amount of ginger and sifted flour enough to roll out smooth. Cut into small cakes, stars, leaves, etc., and bake in a quick oven. This makes a very rich and delicious cake.

### These Fish Build Nests

The Paradise fish, which incidentally is clothed in the prison garment of black and white stripes, and the Indian fighting fish are nest builders. They build nests among the mosses and grasses for their eggs. The male fishes of these species take charge of the babies, and the females have nothing to do with their babies.

SIX YEAR OLD GIRL BURNS TO DEATH IN LOS ANGELES TODAY  
LOS ANGELES, Jan. 15.—Mary Martellotti, aged 6, burned to death today when her clothing caught fire from a fireplace beside which she was dressing. The mother rolled the child in a rug but was unable to save her.

### GORGEOUS CHORISTERS.

Boy Singers of the Private Chapel in St. James' Palace.

There are ten boys in London who every Sunday and on state occasions wear suits of clothes that in each instance cost something like \$200. The lads thus expensively and brilliantly attired are the choristers belonging to the king's private chapel in St. James' palace. When arrayed in their state suits they are truly a gorgeous sight.

Scarlet cloth is the foundation of this costume. Bands of royal purple between rows of heavy gold lace are the adornments. Old lace ruffles are worn at the neck and wrists. These ruffles are so valuable and so difficult to replace that they are worn only on the most special occasions. At other times white lawn bands take their place. The boys must take great care of their suits, which must endure three years. The "undress" suits are replaced every eight months.

This choir is one of the historical institutions of Great Britain, and many of its old time customs, including the dress of the boys, are retained to this day. The choir has numbered among its singers such distinguished musicians as Sir Arthur Sullivan, Edward Lloyd, Sir John Goss and Dr. E. J. Hopkins.

It is the right of the head boy to demand a guinea as "spur money" from any officer entering the chapel wearing spurs. It is said that when Arthur Sullivan was head boy the Duke of Wellington would always come spurred to the chapel, in order that he might have the pleasure of paying the forfeit to his favorite chorister.—Harper's Weekly.

### UNITY OF LIFE.

Cells of Animals and Plants Alike and Governed by Same Laws.

Protoplasm, the literal translation of which means "the first man made," was the name given by a German scientist in 1846 to the shiny, granular, semitolid contents of vegetable cells.

It looks like the white of an egg, and it can be analyzed into four chemical elements—carbon, oxygen, nitrogen and hydrogen. It is now recognized as the fundamental basis for all life. The smallest particle of it goes through what is known as the cycle of life—free motion, feeling, feeding and reproduction. When in some unconscious way it grows a membrane for a covering or a little nucleus, a kernel somewhere within it, science calls it a cell.

These cells are the same in plants and animals. Professor Jacques Loeb showed the importance of this fact. Although plants, he explained have no nervous systems, they have "instinctive movements." In analysis of instincts he found together in the cell common to them the plant and the worm at the root of the plant—as some day, perhaps, the tree of life and the serpent may be bound—and he called their reflex actions "tropisms."

Then he pointed out that tropisms are mechanical acts—that moth and fly and ivy leaf move in spite of themselves in chemical subjection to light, heat and odors, which the scientist calls "emanations."—From "Man as a Mechanism" in Metropolitain.

### Disraeli's Fine Digestion.

Disraeli appears to have been endowed with a most accommodating digestion. When he visited Spain in 1830 he wrote his mother glowing accounts of "the most agreeable dish in the world—an olio. I will explain it to you, for my father would delight in it. There are two large dishes, one at each end of the table. The top one contains bouilli beef, boiled pork sausage and black pudding. The other is a medley of vegetables and fruits, generally French beans, caravanseras and whole peas. Help each person to a portion of the meats and then to the medley. Mix them up in your plate together and drown them in tomato sauce. I have eaten this every day. It is truly delightful."—London Standard.

### Natural Spectacles.

Many birds are provided with natural spectacles, a transparent membrane called the third eyelid. This third eyelid when not in use lies folded in the inner corner of the eye. Two muscles work it, spreading it over the cornea or folding it up again much more cleverly than a man can put on or take off his spectacles. But for its third eyelid the eagle could not look at the sun. The spectacled bear belongs of Chile. Its Latin name is Ursus ornatus. It is black and around its eyes pale rings are drawn which have exactly the appearance of a pair of goggles.

### Disillusioned.

"She had played in amateur theatricals and threatened to go on the stage if her parents wouldn't let her marry the duke."

"And what did her parents do after that threat?"

"They let her go on the stage, gave the duke a check for a front seat and were not at all surprised when he sailed back to France the next morning."—Cleveland Plain Dealer.

### Before and After.

"Bobby, you have been fighting with that Stapleton boy again. Did you count ten before you struck him, as I have always told you to do?"

"No, but I was told that somebody counted ten after he landed on me."—Chicago Tribune.

### His Title.

"No, I shall never marry," sighed the old bachelor.

"The splinter gazed at him scornfully. 'You coward!' she hissed.—Philadelphia Record.

## DUCK SHOOTING MAY BE LIMITED

Hunters of Deer Must Also Be On Guard If Fish and Game Assn. Plan Is Law

SACRAMENTO, Jan. 15.—There will be no more ducks for sale in California markets in the near future; no more baiting of duck ponds, and it will be unlawful to shoot ducks either before sunrise or after sunset, if the recommendations made by members of the great Fish and Game Protective Association, composed of delegates from the various districts, in conference this morning, are adopted by the legislature. The elimination of ducks as a marketable game bird was decided on only after protracted discussion. The motion was carried on the grounds that the rights of the local resident and general public supersede all other rights and also because it is impossible to prevent infractions of the law by pot hunters.

The proposed prohibition of placing bait in duck ponds will be looked on as a blow to the duck clubs located on private hunting grounds.

All these recommendations were voted for unanimously. In order to prevent the continued violation of the law which provides that a hunter shall kill but two deer in a season, it was recommended that each hunter at the time of securing a license be issued two tags signed by the hunter in the presence of the official issuing the license. When a deer is killed, if this recommendation becomes law, the hunter must "tag" it, and then countersign the tag. The possession of a deer without a tag shall be deemed conclusive evidence of violation of the law.

A revision of the present law, which makes it a crime to have deer in possession in a closed district, when an adjacent district allows hunting, was advised. It is intended by this provision to allow deer killed in an adjacent district in compliance with the regulations to be placed on sale in a district where the season is closed. It is explained that if this suggestion becomes law, no hunter will be enabled to kill more than two deer in a season, and the discussion which at present arises from different dates for open seasons will be dispensed with.

## WHITE RIBBONERS

"Household Economics" Was Topic of Interest to Members of Local W. C. T. U.

Santa Ana W. C. T. U. held an extremely interesting meeting yesterday afternoon at the beautiful home of Mrs. Leigh Galloway, 1421 North Main street, with a large number of ladies present. The meeting was presided over by the President, Mrs. L. A. Warren, and Mrs. J. A. Stevenson led the devotional services which were appropriate for the subject for the afternoon. Mrs. Jessie Burned led the singing and Mrs. F. H. McElree presided at the piano. Mrs. Burns also sang very sweetly "Home, Sweet Home."

The subject for the afternoon was "Household Economics," and Mrs. J. N. Anderson as leader of the discussion, spoke on the topic. Mrs. A. J. Visel read a very practical paper on "Economics in the State."

Mrs. Crosier was not present to read a splendid paper which she had prepared, but Mrs. J. N. Anderson gave extracts from the paper. Mrs. W. H. Thomas spoke on a phase of the subject under the title of "National Economics," bringing out some very interesting and startling facts as to the cost of war and the liquor sold in the United States as compared with expenditures for education and the cost of living expenses.

Under the household feature of the topic Mrs. Anderson gave some excellent recipes for mince pies, plum pudding and fruit cake without the use of brandy or wine, and proved that it was not necessary to use liquors in cooking. These recipes can be gotten from Mrs. Anderson.

Discussion on the papers and talks closed the program.

The society voted a resolution of commendation to Senator J. N. Anderson for a valuable bill which he will recommend to the legislature. The bill referred to will provide for the publication of marriage banns for some time previous to the wedding, and will require a health certificate from each of the contracting parties.

It was decided that the W. C. T. U. would be the donor of one of the banners to the winners in the Orange County Triangle League of which R. J. Hamilton is secretary.

Extracts from a letter from Miss Kerl who went from here to South America as a missionary were read to the ladies. It was announced that the quarterly executive meeting of the County W. C. T. U. would meet in Garden Grove Feb. 4.

The next W. C. T. U. meeting will be held at the home of Mrs. Anna Hill Jan. 28 and will be a social meeting. All members who have not paid their dues are asked to hand them in at the next meeting.

## To Bring Miss White Home

Mrs. Lea Warren left this morning for Long Beach where she went to bring her niece, Miss Grace White, home after an eight weeks' stay in the sanitarium in that city. Miss White has had a serious time, having had a critical case of appendicitis for which she finally had to undergo an operation. She is now convalescing and is able to be brought home where it is hoped she will improve rapidly. Miss White is one of the teachers in McKinley school.

## At Balboa Today

Mr. and Mrs. A. L. Dearing, accompanied by Mrs. Dearing's cousins, Mr. and Mrs. J. N. McDowell of Cheriton, Iowa, went to Balboa this morning to enjoy a day at the seaside. They were guests at the Balboa cottage of Mrs. Dearing's sister, Mrs. Hattie Walker of Los Angeles, who was at the beach to meet them. The guests from the east are particularly fond of the seaside outings.

## CLUB WOMEN TO CORONA

Delegates For Annual District Convention Now Being Held at Corona

A number of leading club women of Santa Ana will be in attendance at the Southern District Convention of Women's Clubs beginning today at Corona. Their presence in the convention will doubtless be of more than ordinary interest in view of the recent progressive action of Orange County club women in organizing a County Federation of Clubs.

The program for the Corona convention will be fruitful in interest, topics of importance to club welfare being on the tapis. The district meetings are a sort of a club clearing house where subjects of more intimate and local character can be discussed than at larger conventions. The Southern District comprises the following counties: Orange, Riverside, San Diego, San Bernardino and Imperial, and of these Orange has the largest number of clubs belonging to the State Federation of Women's Clubs.

The delegates elected from Ebell and the Woman's Club, the Art Study Club not electing delegates this time, are as follows:

From Ebell Club—Mrs. Bishop, Mrs. S. M. Davis, Mrs. W. L. Grubb, Mrs. J. R. Medlock, Mrs. S. W. Nau, Mrs. L. A. Roberts, Mrs. Frances Paine of Orange, and Mrs. E. M. Nealley.

Ebell Alternates—Mrs. J. W. Blew, Mrs. A. J. Lawton, Mrs. W. M. Smart, Mrs. M. R. Scott, Mrs. L. J. Carden, Mrs. J. J. Pyle and Mrs. F. L. Austin.

From the Woman's Club the representatives are: Mrs. B. Uttley, Mrs. Elizabeth Mills, Mrs. Alice Gould, Mrs. Annie Gale.

## WOODMEN INSTALLATION

Woodchoppers Induct New Leaders Then Devote Evening to Social Pleasure

After a brief business session last night the Woodmen of the World belonging to Camp No. 355 installed new officers, the ceremonies being open to wives and friends of the members. W. O. Codling, past counsel commander, conducted the installation in an efficient and pleasing manner. There were visitors present from San Diego and other outside points to witness the installation proceedings and all were well pleased.

After the Camp had adjourned, dancing immediately became the order of the evening and with good music and skillful dancers this part of the program was decidedly enjoyable. A banquet served by the ladies followed the dancing hour. All sorts of good things were found in the baskets taken by the ladies and hot coffee accompanied the appetizing spread. Covers were laid for seventy-five or eighty people.

Dancing was resumed after supper and completed what was a gala event in the social annals of the Camp. The members of the Camp will go to Fullerton on Friday evening to be guests at a public W. O. W. installation in that city.

The officers installed last night were:

Past C. C.—Prof. W. C. Roberts.  
C. C.—John W. McElree.  
Advisor—Lieut. Alva Hays.  
Banker—J. D. Phillips.  
Escort—J. Haskinson.  
Clerk—W. G. Gould.  
Watchman—Robert Elliott.  
Sentry—Vinton Mohn.  
Manager—Frank Bows.  
Physicians—Drs. Burlew, Barnes and Ball.

## SPLENDID PROGRAM

Parents and Teachers at Roosevelt School Entertained; Plans For Future Meets

The Parent-Teachers' Association of the Roosevelt School held another splendid meeting yesterday in the Kindergarten building. In the absence of the president, Miss Myrtle Wilson, who was detained by sickness, Prof. Zelman presided.

It was decided by a unanimous vote that the serving of light refreshments during the social hour be continued as this feature had helped greatly during the past year in making the meetings of the Roosevelt section decidedly successful.

The discussion of the examination of the children of the grades by a competent specialist as to eye, ear and throat troubles proved most interesting, and surprise was expressed as to the many cases, such as children with one-fifth vision struggling with those with perfect eyes; children who only heard part of a sentence because of defective ears, and the many "mouth breathers." Parents are beginning to "take notice" and the teachers admit that if the examination does not accomplish anything else it will certainly make them more charitable toward the little sufferers. It was announced that the next meeting of parents and teachers will be a union meeting of all the different sections at the high school and Roosevelt school must be well represented as the meeting promises to be a most interesting one. Parents will be advised as to what books the children had in all the grades best read in order to supplement and aid in their work, also where the books can be procured.

The question box was presided over by Miss Klingens and its features developed the crying need of hurrying up with the "Poly" high as only a part of the pupils of the Roosevelt school can take manual training on account of lack of room. The children love this work and if given a chance would surely prove as capable as the pupils in the U. S. schools in the far away Philippine Islands, who do all the work that the children do here in the grades in half a day and then have half a day for manual training.

Yesterday's program was a splendid one, every number receiving merited applause. The younger members performed in a manner that was a credit to them and their teachers and were greatly enjoyed along with the others who helped to make a program that would have been enjoyed by all the parents of the Roosevelt pupils.

A plan is on foot to have the pupils of each of the various grades furnish the program in order to interest the parents, while the children will receive needed training in public performance.

The program included the following:

Vocal Duet, "The Mountain Violet," Little Misses Mary Geyer and Elizabeth Bruny.  
Recitation, "Columbus," by Janikin Miller, Merrell Wilson.  
Dialogue, "The Fiddler," Walter Frost, Hilbert Yost, Cecil May, Mildred Joice, Helen Hankins, Rhita Read, Jesse Ficus.  
Piano Solo, "Christmas Eve," by Helms, Helen Carnahan.  
Vocal Solo, (a) "If No One Marries Me," (b) "Irish Ballad," Miss Annette Deardorf; accompanist, Miss Nancy Elder.  
Trio, "Winken, Blinken and Nod," Jean Winslow, Rhita Read and Helen Hankins.  
Piano Solo, "Waltz in C Minor," by Chopin, Miss Nancy Elder.  
Two readings from Edwin Vance Cook, "When Father Holds My Hand," and "The Bessing Sin," Miss Borden.

**Mistaken Report**  
The many friends of Mrs. J. W. Shaul will be much relieved in mind to learn that she is not suffering from meningitis as was reported yesterday. Mrs. Shaul is ill with a disagreeable attack of grippe but is not in a serious condition.

It is sincerely hoped that Mrs. Shaul will soon recover from her present indisposition.

**Women's Socialist Union**  
This organization meets at the home of Mrs. D. Edson Smith, 505 West Seventeenth street, Friday, Jan. 16, 1913, at 2:30 p. m. All members are earnestly requested to be present as business matters of importance are to be discussed. A cordial invitation is extended to any who may wish to meet with the members.

**The Tustin Twelve**  
This small club of less than a dozen members has succeeded in reaching the point where every one of its meetings is better than the preceding one, if such a thing is possible. They really have most delightful times at the club reunions.

Yesterday's meeting of the Tustin Twelve was held at the beautiful home of Mrs. Albert Fuller on the corner of McFadden and Lyon streets. A cheerful fire blazed in the open fireplace and as the ladies settled

**You'll Like These Two-Pants Suits At \$5, \$5.50 and \$6**  
So new and "different"—just in from New York by express. New browns—conservative grays.  
Plenty of Norfolks, too,  
at same prices.

**Vandermast & Son**  
Parcels Post Preparers

themselves in comfortable chairs and engaged in fancy work over which the fair fingers were busy during the afternoon, the scene presented was a pleasant one. Besides the merry chat that was indulged in, there were both vocal and instrumental music furnished by Mrs. Chas. Johnson, and the singing of "Sing Me to Sleep," rendered in German by Mrs. Arthur Borden.

**Social Postponed**  
The Christian Endeavor social announced for this evening at the First Baptist church has been postponed indefinitely.

## Personals

Bessie Hill recently accepted a position with the Pacific Telephone Company.

Students who have recently registered in the Commercial High School are as follows: Wm. Schultz, E. L. Boehme, Clinton Corum, Fred Robinson, Eleanor Kege, George Menges, and Adalaid Kees.

Mrs. Earl Glenn and little daughter Margaret, who have been spending the past three months in Brooklyn, Iowa, with Mrs. Glenn's sister, leave tomorrow for Santa Ana.

Miss Celia Cotter spent a few hours in Santa Ana yesterday, coming down from Los Angeles on business.

Mr. and Mrs. John Hook and family who recently came to Santa Ana from the east, expect to soon move to Pomona where Mr. Hook has purchased an orange ranch. He prefers to be near the ranch for convenience in working.

Mrs. Harry Groupe of Chicago, Ill., and her two sons have just arrived here and expect to spend the winter with T. R. LePage, Mrs. Groupe's brother.

Charles Young of Cambridge, Ohio, nephew of T. R. LePage, is visiting at their home on West Third street. He expects to make his home here.

Mrs. T. W. Charlton and daughter, Miss Beatrice Charlton, spent today at Long Beach, going down on an early electric car.

Mrs. E. Zwiger and son, Owen, were Angel City visitors for the day.

## TO MUSIC STUDENTS

Francis J. Haynes, 309 East Tenth street, will receive pupils in voice culture, song interpretation, sight singing, Harmony, counterpoint and composition.

Will take a limited number of beginners or first year students on wind or stringed instruments.

Nearly 18 years experience teaching graduate course of voice and instruments in colleges, schools and conservatories. Phone Pacific 4973.

## ADDRESS IS GIVEN BY L. P. HICKOX

Lou P. Hickox gave a very interesting address before the pupils of Commercial High School on "Health and Success in Business" yesterday. The address was not only valuable but one that was greatly appreciated. This is the first of a series of addresses to be given by business men.

## ESTABLISHING \$3,000 DEBT

Proprietor of Arbor Vale Defendant In Action That Is On Trial Today

Judge West today is hearing evidence in the suit of John Bergan against Mrs. M. E. Morris, who also signs her name as Dr. E. M. Morris, proprietor of Arbor Vale, situated in the San Juan canyon above San Juan Hot Springs.

The case has some peculiarities. Bergan, an aged man, asserts that he loaned Mrs. Morris \$3,000 with the understanding that she was to pay him back after she got title to the homestead. He has no note. His attorneys are placing in evidence a number of letters written by Mrs. Morris to Bergan after he had left Arbor Vale, which was his home for some time, and old drafts to prove the loan. Bergan went on the stand this morning, and then Mrs. Morris was called as a witness. She readily admitted the writing of the letters and her signatures on two drafts.

Attorneys Steele Finley and Dick Harding represent the plaintiff and H. C. Head the defendant.

"Was Judge Willis of Los Angeles your attorney?" asked Finley.

"Yes," replied Mrs. Morris.

"I certainly am surprised to hear that," said Judge West, evidently referring to the fact that a superior judge cannot act as an attorney.

**Both Committed**  
In an early session of the court Judge West this morning committed Henry Grewe and Niels Olsen to the insane asylum at Patton. Grewe is the man who dug open his father's grave at Anaheim. Olsen burned a house at Anaheim, believing he was commissioned to start the burning of the earth.

**For Guardianship**  
Clarence E. Robinson has petitioned to be named guardian of the estates of Emma N., Amos D. and Charles P. Robinson, minors, that he may receive for them an interest of \$1500 from the estate of their grandfather. Tipton & Callor of Anaheim represent the petitioner.

**Pleading Continued**  
On the request of Attorney Clyde Bishop for the defendant the time for F. J. Catterlin to plead on a charge of getting property under false pretenses was continued to Jan. 20 at 9:30 o'clock.

## BOWLING MATCH IS SET FOR TONIGHT

First Event of Kind For Years In Santa Ana; Contest Promises To Be of Interest

There will be "something doing" at the Alexandria Bowling Alleys tonight in the shape of a match game. The teams are captained by Frank Besser, one of the foremost bowlers of the town, and Will McBurney, another good average roller.

As some of the old bowlers of Santa Ana will remember, this is the first match game in ten years in Santa Ana and the event promises excitement.

Besser has with his team Jimmy Strange, who holds high score for the alleys of 263, and McBurney has Scott Torrens who has had National Tournament success. The match will be called at 8 p. m.

The Fraternal Aid will hold installation of officers and supper at Moose hall tonight. All members urged to be present.

Free lessons in macrame and all kinds of crochet and embroidery tomorrow. Merfeld Bros.

## DIED

BLANCHARD—At Newport Beach, Cal., Jan. 15, 1913, Harriett Blanchard, aged 81 years.

The funeral will be held at Mills & Winkler's chapel tomorrow morning at 10 o'clock and will be private.

## BORN

KIMBALL—In Santa Ana, Sunday, Jan. 11, 1913, to Mr. and Mrs. Frank G. Kimball, a son.

SIRABLE BOARD with every accommodation. Sunny, convenient rooms for rent. Call 1933 North Broadway or Home Phone 431.

RENT—Rolling hill pasture. Stock shed. Best of care. Phone between 6 and 8 p. m. 2632, Orange, near Brothers.

RENT—20 or 40 acre ranch close in. Will trade for city property. Call 65 Fruit St.

RENT—5 room furnished cottage on 10th St. Call 1933 North Broadway or Home Phone 431.

FOR SALE—Brown Leghorn pullets starting to lay. Young White Leghorns. 100 hens coming fresh. 25¢. Orange, morning, noon or night.

FOR SALE—Seven young Buff Orpington pullets. "Morrow strain." W. K. Kiven, 1222 Bush.

FOR SALE—Brown Leghorn pullets, 75c. 100 hens coming fresh. 25¢. 1599 1st St. S. S. S.

FOR SALE—100 nice laying hens, all rough moulting. 634 Nakomis St.

FOR SALE—36 Rhode Island Red hens, pairs of canary birds and a brooding hen. Hen and chickens. A rag rug, 2 range, cooking utensils, tub, ironing board and electric iron. Success in Business" yesterday. The address was not only valuable but one that was greatly appreciated. This is the first of a series of addresses to be given by business men.

## THROUGH ORANGE BELT TO YUCAIPA

Yesterday C. Hoefler, John Boose, John Mangold, Hubert Schenck and J. R. Schooley of this city, made an automobile trip through the orange belt to Yucaipa. On the way up they first went through the Villa Park district, making observations all along through Riverside and San Bernardino counties of the damage done by the recent cold weather conditions. According to their reports Orange county shows a remarkably favorable contrast, by comparison. From a few miles up the Santa Ana canyon clear through to the hill-top groves at Redlands, scarcely a tree escaped damage. Through much of the territory the foliage on the eucalyptus trees is frozen. Even the palms along the driveways are black and drooping.

In spite of the appearance of the trees and shrubbery, Orange growers at Corona insist that the fruit is not as much damaged as it was last year, attributing the difference in the effect to the ripener condition, the favorable weather preceding and following the coldest night, and the smudging.

At all points fruit is being hauled to the packing houses. But some growers, especially at Redlands, are stripping the fruit from the trees and leaving it on the ground.

Riverside and Redlands are full of tourists and business appeared to go on as usual.

The trip through Yucaipa was especially interesting, as much activity in development and planting is going on. Mr. Hoefler and Mr. Boose each bought an apple orchard.

## AUTO COLLISION LED TO A CASE IN COURT

ORANGE, Jan. 15.—Tomorrow Justice Fullerton will try a case in which J. F. Richards is plaintiff and W. L. Leiby defendant. Richards asserts that Leiby was to blame for an automobile collision in which their machines took leading parts. Richards wants judgment for \$50. He sent Leiby a bill of \$16 for part of the repairs, and Leiby refused to pay it. Richards says he then concluded to sue Leiby for the entire amount of damages.

## TWO JAPANESE ARE CAUGHT BY BLEE

Yesterday Immigration Inspector Harry Blee took into custody two Japanese who came into this country illegally. Since the men had on shoes made at Mazatlan, Mex., it is thought they came from that place. One of the men was armed with a big revolver and the other had a huge razor. Blee took his prisoners to Los Angeles. They may be deported.

## Famous Stage Beauties

look with horror on Skin Eruptions. Blisters, Sores, Pimples. They don't have them. For all such troubles use Bucklen's Arnica Salve. It glorifies the face. Excellent for Eczema or Salt Rheum, it cures sore lips, chapped hands, chilblains; heals burns, cuts and bruises. Unsurpassed for piles. 25c at all druggists.—Advertisement.

## WORLD TRUST IS REVEALED

One Aluminum Company Controls All World's Business Done In That Line

WASHINGTON, Jan. 15.—The existence of an international agreement covering the aluminum industry was revealed at last night's session of the House Committee on Ways and Means. President Arthur V. Davis of the Aluminum Company of America, admitted that his company, the only aluminum manufacturer in the United States, was owned by the Canadian Aluminum Company, which, in turn, would perfect agreements with all of the six or seven foreign aluminum companies. This agreement, he said, covered all the world except the United States which, he admitted to Representative Rainey of Illinois, was excepted because there was a law here prohibiting it.

Santa Ana Painless Dentists, 102 1/2 East Fourth St. Main 253.

## SURELY BANISHES CATARRH

Where there's catarrh there's thousands of catarrh germs. You don't get rid of catarrh unless you kill these germs.

You can't kill them with stomach medicine or sprays because they can't get where germs are. You can kill these germs with Booth's HYOMEL, a penetrating, anti-septic, balsamic air that you breathe a few times a day directly over the raw, sore, germ infested membrane. It does not contain morphine or any habit forming drug.

For catarrh, croup, coughs, and colds. HYOMEL is sold on money back plan by Rowley Drug Co. Complete outfit, \$1.00. Extra bottles of Booth's HYOMEL if afterwards needed, only 50 cents. Just breathe it—no stomach dosing.—Advertisement.

Better late than never, men say. Better never late says BIG BEN.

Leave your call with him and you will be on time with all of your engagements.

Call and see him and also a full line of mantel clocks.

# "PRACTICAL EDUCATION IN AMERICA" EDUCATOR'S THEME

(Continued from Page Two)

ing that it can be done because there is no repetition. Running clear down through the upper two groups there is a division into three courses; 1. Classical and English; 2. Commercial; and 3. Mechanic Arts. The line of cleavage is not very distinct in the seventh and eighth grades, but as the pupil proceeds the variation becomes more marked.

We shall now mention some attempts to meet the problem through a co-operation of the school and certain industrial groups. This plan is perhaps best known through the Fitchburg plan and the Beverly plan, for an account of which I am indebted to Leavitt's Examples of Industrial Education.

Without going into details of these two plans the essentials are these. The boys are paired. While one boy is in the shop the other is in the school, week about. The industrial teacher of the school one week becomes the boy's shop foreman the next. During the week at the shop he is under shop rules the same as though he were an employee of the shop and is paid for his time, by piece work. The advisability of the piece work system may be doubtful for labor in general, but Leavitt thinks there is no question but that it is the thing to teach the boy to be industrious and careful, for upon his labors depends the amount in his pay envelope. The advantage of this plan to the school is that it gives to the school a splendid shop equipped, furnished with power, standardized, and with a market for the product of the boy. In one of the examples cited the boy is compelled to sign a three year contract, with the approval of his father, before he can enter this kind of school while in the other he may drop the work at any time. In each case he is given a two months' tryout at it during vacation time before the articles become binding on either party. I should mention that the factory pays the instructor's salary while he is the boy's foreman in the shop. To date the system is almost self supporting for the factory, and the superintendent in reporting on it thought it would soon pay its way.

The last system of practical education which I shall mention will be the school maintained entirely by great corporations to equip men for future careers with these corporations. There are a number of them which have been doing this. Of course it is too costly for any but the great organizations to undertake. The railroad courses are conspicuous examples of this line of endeavor, though not the only ones.

These railroad courses include instruction in practically every side of railroading. There is the apprentice course for the boy who is to become a machinist, the school where telegraphy and station accounting may be learned by the aspirant for a station, and a course for the boy who aspires to become a brakeman or conductor. It has remained for the Harriman lines to boldly undertake to train men for administrative lines.

A course of four years is laid out to which any young man between the ages of 21 and 30 is eligible, although preference is shown for employees of the company. A salary is paid the student ranging from \$80 per month for the first six months up to \$100 per month for the last four months. A course of reading is blocked out and practical experience is afforded in the following departments of the railroad: Station Service, Maintenance of Way Service, under Roadmaster and Resident Engineer, Master Mechanic's Office, Student Brakeman and Conductor, Student in Signal Engineer's Office, Student in Store Department, Student in Accounting Department. No guarantee is given that the student will at the end of this time

## GRANDMOTHER USED SAGE TEA TO DARKEN HER FADED OR GRAY HAIR

Mixed With Sulphur It Makes Hair Soft, Beautiful; Cures Dandruff

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She kept her hair beautifully darkened, glossy and abundant with a brew of Sage Tea and Sulphur. Whenever her hair fell out or took on that dull, faded or streaked appearance this simple mixture was applied with wonderful effect.

But the brewing at home is messy and out-of-date. Nowadays skilled chemists do this better than ourselves. By asking at any drug store for the ready-to-use product—called

be employed as an officer, but of course that is the purpose of inaugurating this course.

Armour & Co. and Swift & Co. have for a long time maintained a short course of preparation for salesmen. The young man is sent through all parts of the plant, taught the various cuts of meat, with the methods of preparation, for the market, drilled on prices, etc., and then sent out on the road.

Certain electrical concerns have for years maintained schools of instruction for prospective employees. Numbers of department stores maintain schools for the benefit of their cash girls and boys.

Needless to say, the prime reason for the maintenance of these schools is not charity, nor yet a broad public spirit. It is done in order that the concern supporting them may be insured better employees.

It will doubtless be noted that there has been omitted from this paper mention of a large class of practical instruction that has been undertaken by the school system of the various cities, namely the vocational instruction of the grades, and the vocational high schools, and the continuation school. This has been done because at present they are not integral parts of the common school system and are maintained as separate institutions. They may become ultimately welded into the public schools, or may break off and be maintained as separate institutions with separate management. There are numerous arguments advanced in favor of each of these plans. A second reason for omitting a description of these separate schools was because the writer felt that as separate schools, created for a definite purpose, being specialized schools, a description in this paper was not needed to so great an extent as the description of the other three types of industrial training. Among these are such schools as Commercial High Schools, Business Colleges, Trade Schools (Milwaukee, and Los Angeles for example), Agricultural High Schools, Technical High Schools, and the Intermediate Industrial School.

Another form of practical instruction which has been omitted from this paper for a similar reason is the Continuation school, which is perhaps best known to us in the form of the night school, although there are some kinds of them in Munich, Germany, and perhaps 25 of them in the United States.

There is one form of instruction, however, which should not be omitted. This has been left to the last purposely, because the writer wished to call especial attention to it. I refer to Vocational Guidance. This does not necessarily consist in telling a boy or girl what he or she should do to make a living. There is probably no one in the world competent to do this. The teacher cannot do it because she does not know the child well enough, the mother cannot do it because she knows the child too well, and will magnify his minute defects and microscopic virtues, and even if these variables could be corrected, the boy himself will change in his essential characteristics if he be given the proper environment. But what can and should be done is to en-

"Wyeth's Sage and Sulphur Hair Remedy"—you will get a large bottle for about 50 cents. Some druggists make their own, which is usually too sticky, so insist upon getting Wyeth's, which can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, feverish, itchy scalp and falling hair.

A well-known downtown druggist says his customers insist on Wyeth's Sage and Sulphur, because, they say, it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use too. You simply dampen a sponge or soft brush and draw it through your hair, taking one strand at a time. Do this at night and by morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and abundant.—Rowley Drug Co.—Advertisement.

lighten the boys and girls as to the opportunities there are in the various callings. Point out good books to read along various occupations. Call attention to what have been called blind alleys; callings such as messenger boy, or delivery boy, or fellow in a university, where the pay seems good to the lad, but where there is no outlook. Show him the difference between a job as messenger boy at \$6 per week or as a boot-black at \$6 to \$8 per week, where there is no chance at anything better, and a job as apprentice in a shop at only \$4 or \$5 per week, but where he is learning a trade that may pay from \$75 to \$125 per month. This should be engaged in to some extent in the elementary schools and should be carried on systematically through the high school. In the high school it might be done in the English department as Leavitt suggests or it might be perhaps organized as a department for definite instruction. This instruction might be given by the instructor, by the principal and superintendent, and by successful men of the various lines of business and trades and professions. These talks might include in addition to the customary talk on what elements are necessary to success definite information on what the nature of the work is in each of these callings, the remuneration to be expected, the pleasant and the unpleasant sides, prospects for promotion, the outlook to the trade or profession, etc.

By way of summary.—We have endeavored to bring out the following: 1. The American people have been in practical education but disagree as to what is practical. All American education has had for its major aim, especially at its inception, or at the beginning of a new department or departure, the Practical. Either because of changing conditions outside the school or of the character of the instruction within the school what was once practical may become impractical.

2. Changing conditions have by throwing the work from the family into the ever enlarging, and consequently ever more minutely specializing factory deprived the boys and girls of the opportunity to learn a trade. There are among others four interests seeking to ameliorate conditions, each looking at the problem from its own point of view: Labor, Capital, the State, the Philanthropist.

3. The various attempts to vocationalize the instruction of the school have been for convenience thrown into three groups: (a) The attempt of the existing institutions to meet the demand through a re-organization of the course of study, first by a retention of the traditional 8 and 4 year grouping, as in Cambridge, Mass., Portland, Oregon, and Gary, Indiana, and second, by a change in the traditional arrangement as at Berkeley, Calif., and Concord, N. H.

(b) The attempt to meet the problem through the co-operation of the school and certain industrial organizations as at Fitchburg, Mass., and Beverly, Mass., and

(c) The school maintained entirely by great corporations to equip men for future careers within that particular corporation offering the instruction. The Harriman lines, Armour, and Swift were mentioned as examples of this type.

4. Certain well known types of practical instruction were omitted from the scope of the paper because their status is not definitely settled, or because it was felt they are so well known as not to need description.

5. Attention was called to the desirability for Vocational Guidance. It is not enough that the school afford to the young people of the country, an opportunity to learn the details of any trade or career; they must be advised which to choose. The department store offers practically everything that may be desired but that does not insure economical buy-

## When You Came to Southern California

Wouldn't you have been delighted and wouldn't you have saved some money had you known of the PERSONALLY CONDUCTED TROLLEY TRIPS of the Pacific Electric Railway?

3 GREAT TRIPS | UNEQUALED ANYWHERE | \$1 EACH

Balloon Route Trolley Trip  
Triangle Trolley Trip  
Old Mission Trolley Trip

A total expense of \$3 covers all three trips and gives the traveler the most comprehensive, truthful knowledge of the Southland. RESERVED SEATS. COMPETENT, COURTEOUS GUIDES. PARLOR CARS. RECOMMEND THEM TO YOUR FRIENDS FROM THE EAST. THEY WILL THANK YOU.

Call or write for folders to give or send them.

**Pacific Electric Railway**

## Hill's Corner

We started in last fall with the largest stock of corrugated iron that we ever carried, but the sales have been greater than expected and we have been compelled to buy at later and higher prices in order to meet the demands.

We are compelled to make a higher price than that made last fall, but we are now inside the Los Angeles price and we expect to supply all demands.

Our stock of STOVES and HARDWARE is equal to all demand.

We are making IRRIGATING PIPE and expect to keep at it.

For a "square deal all round"

SEE HILL & SON.

Rossmore Hotel Building

### BONDS FOR RYAN ARE TURNED DOWN

Property Guarantee Is Not Enough; Ironworker Beum's Bonds Are Accepted

CHICAGO, Jan. 15.—The Federal District Court of Appeals has rejected the bonds furnished for the release from Fort Leavenworth prison of President F. M. Ryan, William Shoupe, W. E. Reddin, R. H. Houlihan, iron workers convicted of illegally transporting dynamite. Bonds for \$20,000 for Charles Beum, similarly convicted, were accepted. Federal District Attorney Miller objected to the bonds for the others on the grounds that the property scheduled was insufficient.

**DANCE**  
—There will be a public dance at the K. P. Hall, Tustin, Saturday evening, Jan. 18. Everybody invited. Good music.

### Try Our Sealshipt Oysters

direct from New York and Connecticut.

### CITRUS CHAIR BILL OFFERED IN SENATE

Legislature Asked to appropriate \$100,000 to Further California Industry

SACRAMENTO, Jan. 15.—That citrus fruit farming is a science by itself and a most valuable one to California is the opinion of Senator Mott of Ventura, who yesterday introduced a bill appropriating \$100,000 for the erection of an agricultural college for the study of this particular science.

It is proposed to construct and equip a laboratory building, which laboratory is to be for the use of the department of agriculture connected with the state university at Berkeley. The regents of the university are to be paid the money and that body will supervise the work.

As the head of this laboratory will be an expert in citrus fruit, who has a world-wide reputation as an expert on plant life, it is felt that whatever sum is spent in furthering their plans—either for tutors or equipment and maintenance of laboratory—will be a mere bagatelle compared to benefits that will be derived by the state.

It is estimated that, in all, this institution will call for an expenditure of \$314,360. Senator Thompson, Los Angeles, has charge of a bill covering an appropriation for land on which it is proposed to construct the laboratory, and Senator Combswell of El Monte will father a measure covering the residence, barns and other necessary buildings.

### MOVES OLD BUILDING FOR YEARS A CHURCH

Workmen are now employed tearing down the old United Presbyterian Church building on East Fourth street, which was recently bought by Samuel Mandel. Mandel plans to remove the building to another lot which he will buy as soon as he can find a suitable location.

When he has secured his lot he plans to convert the main building into an apartment house which will contain about 24 rooms. The other part of the building will be used as a store-room for the present but will later be fitted up as a restaurant if a tenant so desires.

Mandel expects to spend in the neighborhood of \$3000 on the improvement.

**Her Version**  
"I was talking with Harold last night and he says he has completely reformed since he has become engaged to you," said the elder lady as she reclined in a luxurious armchair. "Yes," replied the young debutante, "he says I snatched him out of the jaws of death, out of the mouth of hell, back to the 400."—Harper's Bazaar.

### ROCKEFELLER IS ABLE TO TESTIFY

So Says Dr. Richardson; Magistrate's Vocal Cords Weak But He Can Be Heard

WASHINGTON, Jan. 15.—Dr. Richardson, the U. S. medical examiner sent to Miami, Florida, to examine William Rockefeller, has reported to the money trust probers that Rockefeller is able to appear for testimony before the house committee without endangering his health. He said a long examination might injure him but there was no danger in a short testimony. Rockefeller's private physicians recently declared that giving testimony would jeopardize his life. It is believed Chairman Pujo will order the millionaire to appear immediately.

LOS ANGELES, Jan. 15.—The gradual relaying with ninety-pound rails of the entire Salt Lake railroad from Los Angeles to Salt Lake City, a distance of 789 miles, will begin next week. The initial expenditure will be \$250,000 for the first thirty-six miles out of Los Angeles. The entire sum to be spent for this work aggregates \$5,500,000.

### WOMAN, DAZED AND ILL, MAY BE WHITE SLAVERY VICTIM

LOS ANGELES, Jan. 15.—Weak and apparently suffering from an overdose of some drug, a woman who gave her name as Anna S. Hoffman was taken in custody yesterday afternoon at 321½ East First street. She is in the receiving hospital, and is believed to be the victim of a "white slavery" plot. George F. Chandler, said to be her companion, is in the city jail and will be delivered to the federal authorities.

The woman was in such condition last night that the police did not question her at length, but were to make further investigation today.

### DR. HYDE'S THIRD TRIAL HAS BEGUN

KANSAS CITY, Jan. 15.—The third trial of Dr. Bennett C. Hyde, charged with the murder of the millionaire philanthropist, Col. Thomas Swope, began today. The attorneys for the defense tried hard for a continuance, but failed. It is understood that United States Senator Reed will join the prosecution's forces Saturday.

### SALT LAKE TO LAY 90-POUND RAILS

Heavier Steel Costing \$5,500,000 to Be Placed on 789 Miles of Road

LOS ANGELES, Jan. 15.—The gradual relaying with ninety-pound rails of the entire Salt Lake railroad from Los Angeles to Salt Lake City, a distance of 789 miles, will begin next week. The initial expenditure will be \$250,000 for the first thirty-six miles out of Los Angeles. The entire sum to be spent for this work aggregates \$5,500,000.

steadily increasing traffic to and from Los Angeles through the Utah gateway to the intermountain and eastern states is the cause for the use of heavier rails. The rail now in use is comparatively new seventy-five pound steel and entirely satisfactory, but as a provision for the future, General Manager H. C. Nutt will lay the heavier rail.

The steel was rolled by the Colorado Fuel and Iron company at Pueblo and is a western product. It is now being delivered.

### OHIO BELIEVED TO BE NEARING POINT OF ITS RECESSION

CINCINNATI, Jan. 15.—With the Ohio river now registering sixty-two and two-hundredths feet, it is expected a recession of the flood will begin tomorrow. The flooded districts are being patrolled, and the police are carefully examining all buildings where there is a possibility of any weakening by the flood.

### 15,000 HOMELESS IN ILLINOIS AND KENTUCKY DISTRICTS

CAIRO, Ill., Jan. 15.—Fifteen thousand are reported as homeless in the Ohio river valley in Illinois and Kentucky. The water is still rising here. Many business houses are flooded. If the flood recedes within forty-eight hours it is believed the greatest damage to farm buildings will be averted. Many refugees are here who endured much suffering, cold and exposure en route.

### Foils A Foul Plot

When a shameful plot exists between liver and bowels to cause distress by refusing to act, take Dr. King's New Life Pills, and end such abuse of your system. They gently compel right action of stomach, liver and bowels, and restore your health and all good feelings. 25c at all druggists.—Advertisement.

### CITRUS GROWERS MEETING TODAY

Will Discuss Shipments and Plans For Frost Prevention; Roads May Aid Growers

Los Angeles Tribune: Citrus growers of Southern California will hold one of the largest and most important meetings of the last decade this morning at 10 o'clock in the offices of the California Fruit Growers' exchange, when they assemble to discuss the shipments to be made during the next few weeks, and to adopt measures for future improvement of protective systems against frost.

Yesterday the freight officials of the three trunk lines entering this territory met the committee of five chosen by the growers and talked over the situation with regard to need for reduced freight rates on carload shipments of fruit. In the afternoon the freight men held a meeting of their own in the office of W. G. Barnwell, general freight agent of the Santa Fe. Last night each representative telegraphed to his chief his recommendation on the rate requested of 90 cents per hundred pounds of citrus fruit.

It is understood that the 90-cent rate for sixty days was recommended by the local officials. It must be passed upon and approved by the presidents of the three lines and thence wired to the interstate commerce commission at Washington, D. C., before it can become effective. A week or ten days may elapse before this is accomplished.

The recommendation, it is said, will be made on the basis that the reduction of 25 cents per 100 pounds would result in the shipment of an additional thousand or two thousand carloads of fruit; and, furthermore, that it would be an incentive to growers to spend the sum thus saved in freight rates in improving the condition of their groves and getting ready for future crops.

The committee of five will meet again Thursday morning to discuss the general situation and any developments since their last meeting.

### NYE RESIGNS AS HEAD OF BOARD OF EQUALIZATION

SACRAMENTO, Jan. 15.—State Controller A. B. Nye has resigned as president of the state board of equalization, of which he is an ex-officio member, and John Mitchell of Oakland, member from the second district, was elected to fill his place. Nye has desired to be relieved of the work of the office since he became ill several months ago, but remained until the report on the corporation tax was completed.

### Senator Smith Re-Elected.

LANSING, Mich., Jan. 15.—United States Senator William Alden Smith was elected to succeed himself by a party vote in the legislature yesterday afternoon.
